Round-wise Grad-CAM explanation stability
Preliminary single-seed analysis (seed 42)
A. Similarity to previous checkpoint
Mean Pearson correlation
B. Salient-region overlap to previous
Mean Dice score
C. Prediction-target changes
Target-change rate
D. Similarity to final Round 50
Mean Pearson correlation
E. Salient-region overlap to final
Mean Dice score
F. Target disagreement with final model
Target-change rate
Communication round
